Dear patient / deputy legal representative;

You have the right to be informed on the medical, surgical and diagnosis related procedures about your/your patient's health status and recommended for you/your patient, and their alternatives, benefits, risks and even possible damages that could take place, and to refuse or to accept all or part of these, or to stop the procedures to be conducted in any phase.

This form, which we ask you to read and understand, has been prepared to inform you on determining whether you will give consent for the applications or not, and to obtain your permission, and not to frighten you or scare you away from these medical applications.

INFORMATION

PREDIAGNOSIS :.....

PLANNED TREATMENT / ESTIMATED DURATION:.....

INFORMATION ABOUT THE PROCEDURE

The rotator cuff rupture is partial or full-thickness rupture in rotator muscles that moves the shoulder. Shoulder impingement syndrome is shoulder disorder as a result of glenohumeral (shoulder) joint stenosis and pressure onto rotator muscle. Treatment to be applied is the procedure called shoulder arthroplasty, which comes to mean diagnostician, repairing operation or cleaning/extracting diseased tissue going into diagnosed shoulder joint and peripheral structures through small sections with camera and various surgical equipment. Physical therapy and rehabilitation may be necessary after the surgery and this process affects the success of the surgery.

POSSIBLE COMPLICATIONS REGARDING PROCEDURE

- A part of lung may deflate (collapse) and as a result of this pulmonary-chest infection development may come into question. Correspondingly, antibiotics or other advanced medication procedures may be required.
- Blood clotting in leg veins, course with pain and swelling (Deep venous thrombosis) may, even if with a small probability, a small part of this coagulum may detach and occlude another organ. Especially lung obstructions show a fatal course.
- As a result of overwork of heart, heart attack or stroke may develop.
- Mortality risk exists during surgery. This risk exists in every operation.

PATIENT'S QUESTIONS (IF ANY)

CONSENT

I have been told all the results I might have had if I am not treated or if I refused the treatment, and, in respect of all the procedures to be performed while diagnosis and treatment, I have been explained plainly and explicitly that I may encounter with infection, blood coagulation in veins and lungs, bleeding, allergic reaction or oedema at or far from surgical area, epileptic seizure, temporary or permanent organ/system functioning failure, death, including anameia and meningitis.

We know the other risks may be side effects, such as hypokinesis in section area, permanent scar, body deformation as a result of bone subtraction/addition, cerebral fluid leakage from surgical area or needle site, headache or longterm/chronic ache, temporary or permanent voice loss causing from vocal cord palsy, temporary or permanent function loss in organs such as face, brow, tooth, eye or hearing impairment, swallowing impairment and vision loss and loss of bladder and stool control, changes in personality, become disabled due to tissue or organ damage and occurrence of need to use medicine/hormones for a lifetime, short or longterm ache due to position during the operation, and narcotism; and hereby approve these mentioned risks.

I have read the above given information and have been informed by the undersigned doctor. I have been informed about the purpose, risks and complications of the medical or surgical intervention to be performed. I approve this process consciously, without further explanation and under no pressure I hereby authorize the person named with giving approval and being informed about my treatment if I lose my consciousness by some means or another and am not able to give approval during the operations related to my treatment.

.....(Please write "I acknowledge that I have read and understood above" in your handwriting)
